Rules for Furnace & Laminar Flow Hood Users

Room 301 contains the tube furnace and the laminar flow hood. These units are available for users without the need for gowning. However, because this room provides entry to the cleanroom, it must be kept reasonably clean. Therefore, all users of these facilities are to wear booties at all times. These are to be removed and disposed of whenever you leave the room.

Note: Rajib Ahmed is to be contacted if you wish to use the laminar flow hood.

Your full cooperation is expected. Violation of the rules may result in revocation of user privileges.
