F.T. Ulaby and M.M. Maharbiz, Circuits, NTS, 2009

Course website: www.ece.rochester.edu/courses/ECE113/

Miscellany: Problems are assigned on Wednesdays & collected one week later in lecture unless otherwise stated; pop quizzes covering assigned material may be expected when the instructor is in a bad mood. The instructor’s mood is discernibly improved by active class participation.

Lab. reports, which must be signed by both team members, are due at 5 pm in Hopeman 304, one week after the lab work is completed. Laboratory work is integral to this course & you may expect each exam to contain questions derived from these assignments. Clear, concise writing is an expectation in these reports.

Late Policy: Late work will not be graded. If serious illness or family emergency prevents you from handing in an assignment on time, taking a quiz or examination, or doing a laboratory, please contact the instructor-in-charge as soon as possible to arrange a makeup.

Athletics participants: Please inform the instructor well in advance of any absences from campus for athletic competitions.

Spring Break: Do not request special arrangements for class work to accommodate Spring Break travel plans.

Wireless devices: Use of wireless devices is never welcome in lectures or labs.

Academic Honesty: All work handed in for grading in ECE113, including lab. reports, is accepted only with the implied representation that it has been performed and written up by person or persons whose names appear on the paper. If you are unfamiliar with the word plagiarism and its meaning, please consult a dictionary. Applicable university policy concerning academic honesty will be strictly observed in ECE113.
